

## EASYSUITE

### Simply Connecting Systems, People, Expertise

EASYSUITE is the next generation OR integration solution, offering efficient multidisciplinary collaboration through scalable video over IP routing of uncompressed 3D/4K video signals, medical equipment control, hospital-wide image management and virtual collaboration. With EASYSUITE, the full Olympus 4K BT.2020 imaging chain from an Olympus 3D or 4K camera to a Sony 3D/4K surgical field display is ensured. Hospital-wide security based on Windows 10, the latest Enterprise IoT platform, and virus protection safeguard patient privacy and support hospitals in complying with GDPR.

#### Features and Software

HD Record

4K Image Capture

4K Routing

VSS (VaultStream)

PGS (Patient Greeting System)

Multi-View Tiling

PHI Masking

Remote PC Control

Interfaces to PACS/HIS

MedPresence

#### Program and Software

Surgical Field Displays

Central Power Mgmt.

Medical Device Control

Light Control

Advanced Audio

Hospital-Wide Security

#### Clinical Benefits

- Integration of patient data from HIS and PACS systems to standardize patient records.
- Supports patient safety and standardization of the procedure through centralized control of medical equipment and presets.
- Interactive virtual collaboration with remote colleagues resulting in improved patient outcomes through well informed decisionmaking (with MedPresence).
- Securely share recorded procedures with colleagues and residents across the hospital (with VaultStream).

#### Economic Benefits

- Workflow-oriented user interface maximizes efficiency and optimizes productivity by supporting all relevant procedure steps.
- Scalable platform allowing hospitals to later add functionality.
- Easy to learn and use workflow based interface supporting reduced room downtime and increased turnaround time as well as improved clinician productivity and satisfaction.

#### Security Benefits

- Industry expert tested solution to protect against unauthorized access and use of information.
- Supports GDPR compliant access to clinical images and video throughout the hospital automatically upon surgical case completion.
- Smart checkpoints and retry on failure ensure complete and accurate patient records.
- Built on the latest Microsoft Enterprise IoT platform, which offers numerous IT security protection mechanisms, ensuring hospital-wide security.

Specifications, design, and accessories are subject to change without any notice or obligation on the part of the manufacturer.
