# Medical Virus Filters

## Be on the safe side and reduce the risk of viral spread

Electrical, mobile suction pumps, equipped with filters and accessories help to prevent viral spread in hospitals and care centres. We offer one complete infection control filter portfolio and fulfil new and strictest requirements (ISO 10079).

### Safe

- Lab-tested high virus retention grades of **99.99984 %** for particles larger than 0.03 µm
- Filters all types of **Coronavirus**: 2019-nCoV, SARS-CoV, HCoV NL 63 and HKUI
- Also filters other virus and bacteria types

### High Performance

- Dedicated, high-performance medical membranes
- Low air resistance due to the large surface area

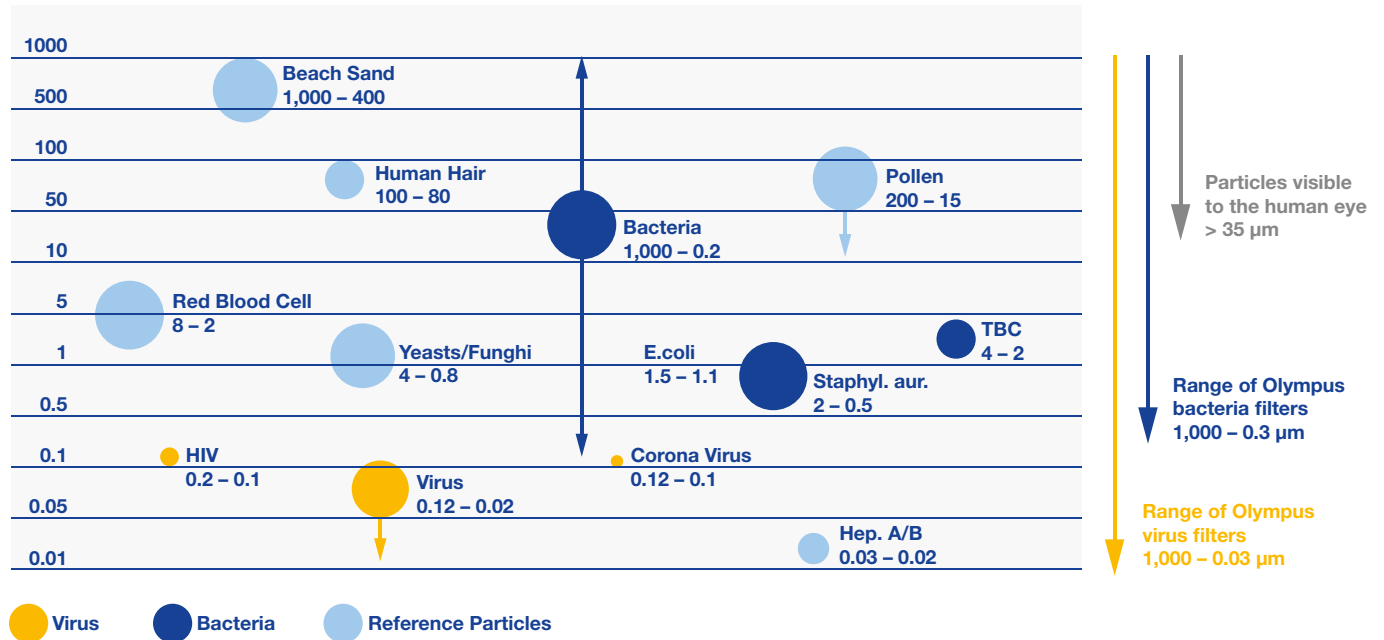

### Flexible

- Olympus' disposable virus filters are seamlessly compatible with Olympus KV-6 for endoscopic, airway and surgical suction
- Custom-configure your suction system to **minimize the risk of cross-contaminations**

# Medical Virus Filters

## Filtration Efficiency - $\mu\text{m}$ (Micrometer)

### Filter Replacement

- Filter should be replaced -
- in the event of overflow or clogging, or
  - weekly with single patient use, or
  - daily with multiple patient use

To detect a clogged filter, perform a filter test before each patient use, always complying with in-house directives on hygiene.
