EASYSUITE is a reliable operating room integration solution innovating workflows and simplifying daily tasks across...
Olympus Provides ...

- State-of-the-art technology in native 3D/4K resolution
- Virtual collaboration with colleagues
- Easy sharing of and access to recorded data
- Data protection to the highest standards complying with GDPR

... and much more, tailored to your needs.
What Is Your Key Function in the Hospital?

I manage
the hospital assets and decide about any investments.

I take care
of the patients. Their wellbeing is my responsibility.

I maintain
the IT infrastructure and provide troubleshooting in case of software issues.

I am responsible
for the medical devices. If the equipment does not work properly, I am the first to be called for help.

I support
hospitals in the design of operating rooms and manage projects with different partners.

Data Safety

Your Challenge
Risk of losing procedure data

Our Solution
Innovative components of system safeguarding data in case of power corruption or network failure
Live Updates and Remote Support

Your Challenge
Complicated to manually update systems and slow support availability increasing system downtime

Our Solution
Effortless live updating of patches and remote support for fast and easy problem-solving
Implementation into Network

Your Challenge
Difficulty in integrating existing hospital systems (e.g. PACS, HIS, VNA)

Our Solution
Easy implementation into existing IT infrastructure and connection to hospital network
What Is Your Key Function in the Hospital?

I manage the hospital assets and decide about any investments.

I take care of the patients. Their wellbeing is my responsibility.

I maintain the IT infrastructure and provide troubleshooting in case of software issues.

I am responsible for the medical devices. If the equipment does not work properly, I am the first to be called for help.

I support hospitals in the design of operating rooms and manage projects with different partners.
Excellent Image Quality

Your Challenge
Insufficient image quality for diagnosis with high latency

Our Solution
Achieving of excellent image quality effortlessly without any compressions/latency in 3D/4K resolution
Automatic System Updates

Your Challenge
Time-consuming and one-by-one update of hospital-wide equipment

Our Solution
Updates deployed automatically from server to the equipment in the procedure rooms
Vendor Neutral

Your Challenge
Lack of standardization and closed platform not supporting connection to existing devices from other manufacturers

Our Solution
High compatibility with a great variety of OR-relevant equipment and systems

OR = Operation Room
What Is Your Key Function in the Hospital?

- **I manage**
  the hospital assets and decide about any investments.

Our new operating block with System Integration solutions represents a significant shift in professional work. System Integration technology will allow our surgeons to develop faster, adopt new technologies, communicate with colleagues from other hospital centers and, most importantly, raise the level of safety of surgery for the benefit of our patients and staff.

Ivica Fedel  
MD consultant in general and abdominal surgery  
Deputy director of Pula General Hospital, Croatia
Interventions in communication or workflow led to greater improvements in clinician satisfaction […] and showed a trend toward greater improvement in intention to leave [the job].

https://link.springer.com/article/10.1007%2Fs11606-015-3235-4

[…] 78.6% [of asked surgeons] felt that telementoring would be useful to their practice, and 69.8% thought it would benefit their hospitals [by] […] learning new techniques (46.5%) [and by giving] intraoperative assistance with unexpected findings (39.0%).

Glenn IC., Bruns NE., Hayek D., Hughes T., Ponsky TA. – 21 July 2016

[…] expected durations (of telementoring sessions) were considerably longer for stationary computer. Ability to perceive and identify anatomical structures was insignificantly lower on small sized devices. Stationary and tablet platforms were nearly equally preferred by the most of participants as default telementoring hardware.

A leading manufacturer of optical and digital precision technology in the medical field.

A trusted partner that patients and customers can always rely on.

With 100 years of history.
For more than 15 years, we have been providing assistance from design to installation, improving the OR workflow.

800
Fully integrated ORs in EMEA
PMI certified managers

This way, we increase the quality of patient outcomes you can achieve throughout the continuum of care.
This way, we increase the quality of patient outcomes you can achieve throughout the continuum of care.

We support an **early and accurate diagnosis** by means of flexible scopes for GI, urology, EBUS, ENT and GYN in the clinics.
This way, we increase the quality of patient outcomes you can achieve throughout the **continuum of care**.

We support *proper treatment* with our HD, 3D, 4K, THUNDERBEAT and therapeutic endoscopy products.
This way, we increase the quality of patient outcomes you can achieve throughout the continuum of care.

We support a thorough follow up via: our flexible endoscopes in the clinics and GI lab.
Each of these occur in very different physical locations within a hospital. That’s why we enable you to truly complete the continuum of care by:

- Saving presets throughout the clinician’s and patient’s visits
- Easily providing diagnostic and surgical images, videos, and patient information across the hospital, facilities or country
- Allowing users to collaborate with colleagues across the globe in real time
If you like what you have seen about EASYSUITE, we would be keen on showing you more!
