STONE MANAGEMENT

No-Tip Nitinol Baskets

Flex-Catch, Ultra-Catch and X-Catch for Reliable Stone Removal
Flex-Catch 1.9 Fr
The Flex-Catch NT stone retrieval device is flexible enough to conform to the anatomy while maintaining its shape to facilitate capture and release of stones. The no-tip design with four round wires minimizes tissue trauma during manipulation. This new basket is designed such that it gradually opens to capture stones of varying sizes.

- Small 1.9 Fr. sheath: Improved irrigation and visibility within small working channels.
- Flexible composite sheath: Maximum scope deflection and smooth scope passage.
- Gradual basket opening: Easy control over basket size to capture even small fragments.

Ultra-Catch 4-Wire No-Tip Nitinol Basket
- Torque-responsive shaft and ergonomic handle provide the control and security to ensure safe and effective stone removal.
- Rotation wheel of the handle allows for single-handed operation.
- Highly durable twisted-wire cage design maintains its shape and form even under extreme duress.
- Nitinol construction makes the shaft kink-resistant, thereby delivering safety, functionality and durability.
- Flexible distal end minimizes deflection loss of the scope.

X-Catch 6-Wire No-Tip Nitinol Basket
- Paired wire basket for higher radial dilation force for stone manipulation in restricted anatomy.
- Paired construction enables capture of several small stones in one pass to save time.
- No-tip design for atraumatic stone capture in the kidney.

No-Tip Nitinol Baskets
Versatile Portfolio

Flex-Catch Features

- No-Tip Design with Round Nitinol Wires
  Distal tip design allows fragments to be captured close to the tissue and minimizes tissue trauma.

- Flexible Nitinol Wire Design
  Nitinol wire design conforms to patient anatomy.

- Ergonomic Handle
  Thumb slider moves in the same direction as basket opening/closing.

- Minimal Deflection Loss
  For lower pole stone capture.

Ultra-Catch and X-Catch Features

- Ultra-Catch and X-Catch Features

- No-Tip Design
  Patented distal disc design is truly tipless and offers atraumatic basket manipulation.

- 6-Wire Structure and Backstop
  Designed to remove several small fragments in one pass while greater wire surface area prevents inadvertent stone escape.

- Easy-Grip Handle
  Ergonomic design as never seen before in stone retrieval devices.
